

Four upper secondary students participated in the 5D4N M0E-0BS Inclusive Sailing Program in partnership with Bedok View Secondary School. During the program, students gained hands-on experience in working together to navigate a sail craft around the waters of Pulau Ubin.

Beyond sailing skills, this initiative enhanced their social-emotional competencies, fostering qualities such as teamwork, communication, and resilience while also providing opportunities to practice essential daily living skills. This collective endeavor exemplified the beauty of inclusivity in sailing, where individuals with diverse abilities came together to navigate the waters as a united team.
